or call 813-444-1011**

Dr. Ajay Kakar

### Why should you register?

- Learn the most revolutionary, but most logical and rational concepts in dentistry
- Start doing full-mouth rehabilitations in 4 to 5 visits
- Objectively make ideal smiles for patients using the Smylist Aesthetic Software
- Generate virtual smiles in a matter of minutes to motivate patients
- Explore the fascinating concepts of Smylist which irrevocably links the mandible with multiple medical issues
- Make patients look up to 10 years younger with the Gnatho Aging Therapy

# SMYLIST® WORKSHOP DETAIL

Objective aesthetics and Rational function have to exist together and the human dentition should work towards this co-existence. This session will elucidate the Smylist concept and the paradigm shifts the concept has brought about in dental therapy.

The Smylist Aesthetic software will be demonstrated and delegates will get the chance to try it out on their own laptops (Only Windows based) and use the objective Aesthetic principles. The Negative cascade effect of a rotated mandible and the chain of events triggered by it will be presented.

Smylist instant deprogramming demonstration on live cases. Interaction with delegates on how the deprogramming works.

The Smylist workflow to carry out full mouth rehabs in 4/5 visits using the Smylist software and digital technology.

IAOC

# SMYLIST® DELEGATE EXPERIENCES

**One thing about this concept by Dr. Maria Csillag that I will keep saying is 'Mind Blowing'**

In all my 11 years of practice, I have had certain patients for whom after correctly applying the conventional principles of Smile design, a voice from inside said there was still something missing in the smile for that patient. Dr. Csillag has identified, classified and systematically charted that inner voice to come up with a new concept 'Smylist' which makes more sense. A musculoskeletal smile designing to give a holistic rehabilitation to your patients.

**Dr. Vinothini Kanan**

**One hell of a course with incredible insights!**

It's really amazing how we dentists can treat wrinkles, signs of aging, migraines, body aches, and even correct body postures by just correcting the bite. Thank you Maria Csillag for making this concept understandable and a big thank you to Dr. Ajay Kakar for bringing Maria to India.

**Dr. Poonam Punjabi**

**Now we have answers or why ceramic chips**

I am a living example. if I had knowledge of this 45 years ago in 1972 post braces my rest in peace RIP Status with bilateral hip replacements would have been different. Now I was heading for knee replacements. Thank you Maria, I may never need them.

**Dr. Mukul Dabholkar**
